DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-30, drawn to a system that sends only parts of image data to a display that have changed from the previous transmission to the display and determining which image data was previously transmitted by sending a indicative (cache) of the display image, classified in class 345, subclass 557.
- II. Claim 31-33, drawn to a memory location for storing image display data wherein a command is issued to a graphic processing system to perform an operation, classified in class 345, subclass 501 or 522.

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as determining which image data was previously transmitted to a display device by sending a indication (cache) only of part of the display image that have changed. See MPEP § 806.05(d).
